DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, 15-18, drawn to a method of determining the severity of Chronic Obstructive Pulmonary Disease (COPD) in a patient.

Group II, claim(s) 5-8, 19-22, drawn to a method of treating a patient suffering from COPD.

Group III, claim(s) 9-12, 23-26, drawn to a method of determining the responsiveness of a patient with COPD to therapy.

Group IV, claim(s) 13-14, drawn to a product for the prognosis of COPD severity in a patient.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

According to PCT Rule 13.2, unity of invention exists only when there is a shared same or corresponding special technical feature among the claimed inventions. All the groupings are directed to determine of E-cadherin in patients' sample and correlate FEV1. However, each group has a different special technical feature not shared by the remaining groups. The special technical feature of determining severity of COPD in a patient in group I by measuring concentration of E-cadherin and correlate with the FEV1 in group I, is not shared by any of the remaining groups. The special technical feature of treating a patient suffering from COP in group II by administering a compound to the patient and determine the extent of the disease by

identifying the levels of E-cadherin in patient's blood serum and/or urine sample, is not shared by any of the remaining groups. The special technical feature of determining the responsiveness of a patient with a COPD in group III by determining the rate of change of extent of progression of the COPD by reference to a correlation graph which correlates FEV1 with E-cadherin, is not shared by any of the remaining groups. The special technical feature of means to report the concentration of E-cadherin in the blood serum or urine of COPD patients and a correlation graph which correlates FEV1 with E-cadherin concentration for the prognosis of COPD severity in group IV, is not shared by any remaining group.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob Cheu whose telephone number is 703-306-4086. The examiner can normally be reached on 8:30-5:00.
